

EXPERIMENT 2

Title: Online Hotel Room Booking System

Aim

To design a hotel room booking webpage with room availability and reservation functionality.

Output

The screenshot displays the HotelEase online hotel room booking system interface. At the top, a dark blue header features the HotelEase logo and the text "Online Hotel Room Booking". Below the header, a "Search Rooms" section contains input fields for check-in date (08/11/2026), check-out date (08/12/2026), and the number of guests (2 Guests), along with a "Search" button. The search results are presented in three columns, each for a different room type: Deluxe Room, Executive Room, and Luxury Suite. Each room type card lists its features (King Bed, Free Wi-Fi, Air Conditioning for Deluxe; Queen Bed, Free Wi-Fi, Breakfast for Executive; King Bed, Pool Access, Free Breakfast for Luxury Suite), the price per night (₹3,500, ₹5,000, and ₹8,000 respectively), and a "Book Now" button.

Room Type	Features	Price / Night	Book Now
Deluxe Room	King Bed, Free Wi-Fi, Air Conditioning	₹3,500	Book Now
Executive Room	Queen Bed, Free Wi-Fi, Breakfast	₹5,000	Book Now
Luxury Suite	King Bed, Pool Access, Free Breakfast	₹8,000	Book Now

Result

A responsive hotel booking webpage is created with room search, room details and booking confirmation.
